What Is Generative AI?

ChatGPT

An OpenAI service that incorporates a conversational chatbot with an LLM to create content. It was trained on a foundational model of billions of words from multiple sources and was then fine-tuned by reinforcement learning from human feedback.

Large Language Models (LLMs)

AI that is trained on vast amounts of text, allowing it to interpret and generate humanlike textual output.

Foundation Models

Large machine learning models. They are trained on a broad set of unlabeled data, fine-tuned and adapted to a wide range of applications.

Generative AI (GenAI)

AI techniques that learn from a representation of artifacts in a model and generate new artifacts with similar characteristics.

AI? DI COSA STIAMO PARLANDO

Generative AI (GenAI)

AI techniques that learn from a representation of artifacts in a model and generate new artifacts with similar characteristics.

Artificial Intelligence

AI applies advanced analysis and logic-based techniques, including machine learning, to interpret events, support and automate decisions and take actions.
